Ton21 (T21) – White Paper

1. Introduction

Ton21 (T21) is a community-driven token built on the TON blockchain with a strictly limited supply of 21,000,000 tokens. The mission of T21 is to bring scarcity, transparency, and community power into the TON ecosystem. T21 aims to create long-term value through fair distribution, decentralized liquidity, and community governance.

2. Problem & Solution

The TON ecosystem is flooded with meme coins and tokens lacking sustainability. Many projects have unlimited supply and weak fundamentals. T21 solves this by offering a limited supply, transparent tokenomics, and a clear roadmap, making it a strong candidate for long-term growth.

3. Tokenomics

Total Supply	21,000,000 T21
Liquidity	30%
Community & Airdrops	20%
Development	20%
Team	10%
Reserve	20%

4. Liquidity & Trading

T21 is tradable on DeDust.io via the T21/TON pair. Users can import the token manually using the following contract address: **EQBLgiPMIy982IMGqaudqX0Fe_N01arD-LhIKSfxBd8rzYRG**. Liquidity is community-provided, and transaction fees will reward liquidity providers.

5. Roadmap

Q3 2025: Token launch, liquidity pool creation, Telegram group (Ton21 Army).
Q4 2025: Marketing campaigns, airdrops, and CoinGecko listing.
Q1 2026: CoinMarketCap listing, staking mechanisms.
2026: Community expansion and strategic partnerships.

6. Community

T21 is built for its community – the Ton21 Army. Community members participate in decision-making, receive airdrops, and benefit from project growth. Official resources:
Telegram: https://t.me/Ton21_Army
DeDust: https://dedust.io

7. Conclusion

Ton21 (T21) is a scarce, transparent, and community-driven token designed to strengthen the TON ecosystem. With only 21M supply and a clear vision, T21 represents an opportunity to build long-term value together with the TON community.
